Carroll Technologies Group Expands Again
Now Servicing the Industry with 12 Operations Centers

Beckley, West Virginia, May 24, 2010 ---- Carroll Technologies Group, America's largest independent electronic services organization to the coal industry, today announced its latest business expansion with the opening of Carroll Midwest, a new operations center for sales and service in Mount Vernon Illinois. According to Mike Hastings, President of Carroll Technologies, "We are extremely happy to be covering more of the coal mining market with our new operations center in Mount Vernon. To be a leader in our industry, you have to be close to your customers to give them the products and support they need when they need it."

The new Mount Vernon, Illinois branch will be managed by Dennis Zedalis, a longtime veteran of the coal mining industry and is located at:

Carroll MidWest
1501 Lake Terrace NE
Mt. Vernon, IL 62864

Phone: 618-237-3490
Fax: 618-244-9644
Email: dmz@carrollengineeringco.com

Like the company's other operations centers, the new Carroll Midwest center will include sales, service, repair operations as well as an extensive spare parts depot. Also, it will provide around the clock responsiveness to customer calls for help through Carroll's networked MinerCare 24/7™ service organization. Hastings said, "Our customers operate 24 hours a day. When they need service or a spare, they need it right away – not in days or weeks. Our 'round the clock' service operation along with our broad product lines, rapid repair capabilities and our in-house engineering skills separate us from the competition. We want to make sure that we help our customers keep the mines running full time."

Mike Hastings also indicated that the company is in the process of preparing plans to open several additional operations centers this year. The company's network of operations centers spans Appalachia, the South East, Mid West and Western USA with over \$7 million in parts, components, and replacement spares.

About Carroll Technologies Group

Carroll Technologies Group consisting of Delta Electric, Inc. and Carroll Engineering Co. has been servicing the mining industry in North America for over 30 years. From its early history in the coalfields of West Virginia and Kentucky, Carroll Technologies Group has expanded to become the largest privately held and best electronic services group in the U.S.A., providing over 800 mines with advanced technology communications, employee and equipment tracking systems, safety monitoring systems, and a broad range of other safety equipment. Today Carroll Technologies Group and its two operating subsidiaries – Carroll Engineering Co. and Delta Electric Inc.—service the needs of mining companies with a network of 12 distribution centers and Miner Care 24/7™ support offices strategically located in 7 states.
